Cordova

OBJECTIVE

My ultimate goal is to collaborate with others to make a positive impact: to identify and fulfill needs. There is little as satisfying as bringing relief and joy to people through accessible, clever solutions. Presented with exciting possibilities such as dream recording, strong A.I. companions, and fully-immersive virtual reality, I grow increasingly excited to be a part of the unstoppable advancement of society, technology, science, and culture.

MY PORTFOLIO

CARGO LAYOUT LOGISTICS SOFTWARE

As a software developer at Tapestry Solutions, I debugged, modified, and implemented both server-side and client-side functionality of the existing SLP cargo logistics planning software (within the ICODES...
